

Trusted partner to law enforcement.

Over 2,000 public-safety professionals joined last year alone.

Tracers provides law enforcement the data expertise to help solve crimes and protect our communities.

Accessing data in real-time is critical for law enforcement, particularly for preventing, detecting, and investigating crime and apprehending criminals when time is of the essence. For over twenty years, Tracers has equipped federal and local law enforcement agencies with the tools they need to effectively and expediently connect the dots between people and their public records data, analyze intelligence, securely manage investigations, produce reports, and respond to crime as it happens. These tools enable law enforcement to search for criminals and witnesses and uncover the associations between people, nationwide. Additionally, this unique data-linking capability also connects subjects with associates, businesses, assets, email addresses, and their federal and civil histories.

Instantly connect with the data you need:

- Robust People Searches
- Reverse Phone Directory
- Criminal Records
- Court Records
- Asset Searches
- Workplace Records
- Domain Registrations
- Business Searches
- Address Records with 40-Year Histories
- Possible Relative and Associate Searches

Solve cases faster, find missing children, and reduce crime.

Tracers has been a dedicated supporter of law enforcement for over twenty years, and even offers free access to some law enforcement agencies and departments that do not have the investigative data resources they need.*

*Qualifying law enforcement agencies that currently do not have access to any other investigative data can receive 1 account with 1 user with a \$0.00 monthly subscription. Must provide a credit card for billing of any searches ordered that are not included in monthly subscription.
